#### **Language**

English

#### **Programme Highlight**

##### **Tseung Kwan O Desalination Plant (TKODP)**

The Tseung Kwan O Desalination Plant (TKODP) is one of the strategic infrastructures by WSD in its mission to provide reliable and adequate supply of wholesome potable water which is not susceptible to climate change.

Upon commissioning of the First Stage of TKODP, the production capacity of potable water is around 135 million litres per day (Mld), equivalent to 5% of daily fresh water consumption in Hong Kong, with future expansion to ultimate capacity of 270 Mld.

During the visiting, the guided tour will lead visitors through various locations to explore the construction and operation of Tseung Kwan O Desalination Plant and offer visitors an immersive experience, featuring an introduction film presented on a 270-degree LED screen and a 4D experience within a simulated cave.
